connect and control your favorite media applications

 **Euphonix**

the perfect mix of form and function

The new Artist Series MC Mix brings the unparalleled speed, resolution and DAW integration of Euphonix' high-end professional consoles to your studio in a revolutionary ergonomic, slim-line design. The MC Mix easily fits into any studio, sitting perfectly between a computer keyboard and screen, and multiple units can be connected to create a larger, integrated control surface.

The MC Mix lets you effortlessly switch between multiple applications and even workstations at the touch of a button – the touch-sensitive knobs, motorized faders, and high-resolution OLED displays automatically set themselves to whatever application is in the foreground to provide immediate access to multi-format metering, plug-in parameters, EQ curves and much more.

Most importantly, Euphonix has worked closely with the world's leading software developers like Apple, Steinberg, MOTU, Apogee and others to deeply integrate native support for Euphonix' EuCon control protocol into their DAWs to deliver an unmatched editing and mixing experience.

MC Mix Power Features:

- Controls multiple audio/video applications via Ethernet
- 250X faster and 8X the resolution of MIDI
- Supports HUI and Mackie Control protocol
- Slim-line design for easy studio integration and portability
- Link up to four MC Mix controllers and/or an MC Control for up to 36 faders

1 Touch-sensitive Rotary Encoders (8) and Knob Select/On Keys

Offer direct control over everything from panning and gain to editing your most powerful plug-ins and EQ – these knobs can also be pressed to select/deselect and navigate through parameters

2 Touch-sensitive Motorized Faders (8)

High-quality ALPS 100mm long throw faders offer accurate and smooth mixing - touching a fader will automatically select the corresponding track

3 Record/Automation Keys

Enable direct arming of tracks for recording and/or selection of each track's automation mode

4 Select/Assign Keys

Lock the selected track to a dedicated fader while allowing you to bank through tracks with the remaining faders – perfect for master fader and submix applications

5 Knob Set Selector Keys

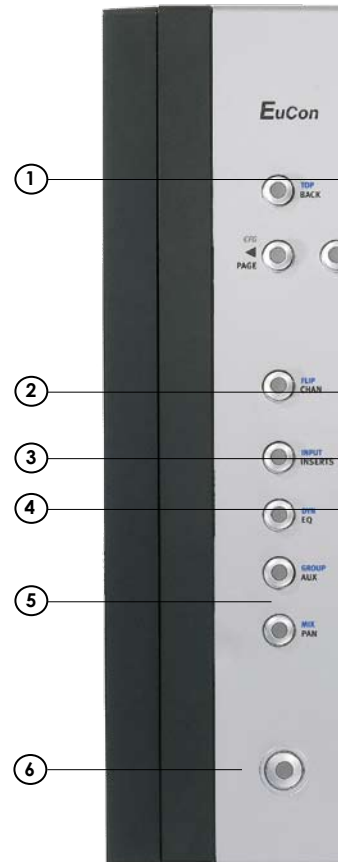

Quickly assign the rotary encoders to control plug-ins, EQs, panning, signal routing and much more – you can either control the same parameter across all tracks or assign all knobs to one track for easy editing of multiple parameters at once

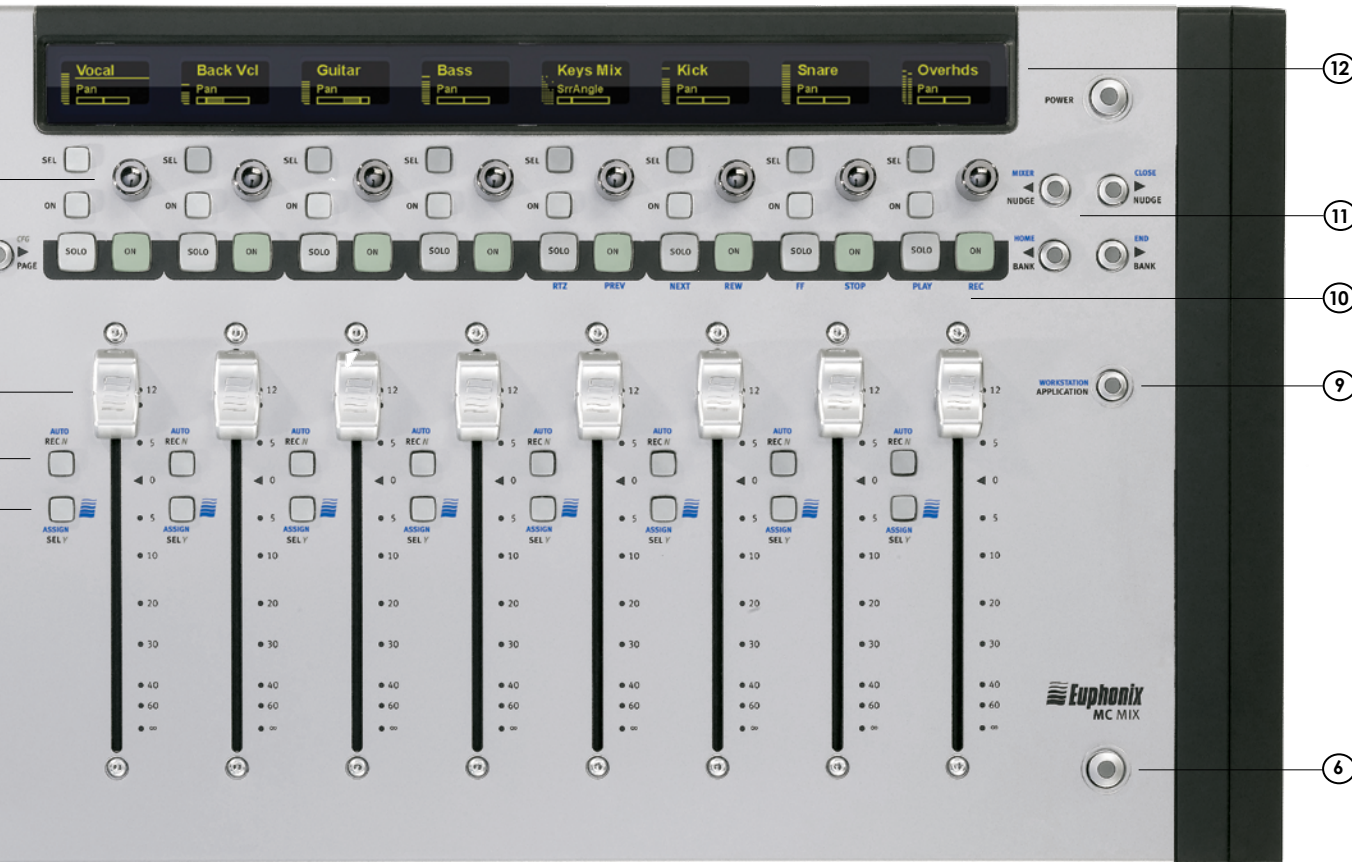

6 Function Keys (Shift Keys)

Used in conjunction with other keys on the MC Mix to provide alternate functions

7 Footswitch Jack

Punch in and out of recording when footswitch is connected

12 Channel Display

High-resolution 128 x 64 pixel OLED display provides track name/number, detailed metering (from mono to 5.1 surround data), parameter name/value currently being modified by its corresponding rotary encoder, current automation mode and more

11 Track Navigation

Scroll through tracks using the Bank buttons (in groups of eight tracks at a time) and Nudge buttons (one track at a time)

10 Solo/Mute/Transport Keys

These keys solo/mute tracks and serve as transport controls when the Function Key is depressed

9 Application/Workstation Change

Application Change lets you cycle through your applications, while the Workstation Change allows you to switch between multiple workstations

8 Ethernet Port

Connects the MC Mix to your Mac - Ethernet hub or switch required to connect additional MC Mix unit(s) and MC Control unit or connect to a network

Riser Brackets included
to increase height and viewing angle

EuCon is a high-speed Ethernet control protocol developed by Euphonix that allows the MC Mix to connect to any Mac OS X application. EuCon carries control information for faders, knobs, displays and more, between the MC Mix and whatever application is in focus on your computer.

EuCon features:

- simultaneous control over multiple applications and workstations via Ethernet
- high-resolution, high-speed control over almost all DAW functions
- 250X the speed and 8X the resolution of MIDI
- support for HUI and Mackie Control protocols
- universal control of any software application

Works with:
 Apple LOGIC PRO
 Apple SOUNDTRACK PRO
 Steinberg NUENDO
 Steinberg CUBASE
 MOTU DIGITAL PERFORMER

Apple FINAL CUT PRO
 Propellerheads REASON
 Ableton LIVE
 Digidesign PRO TOOLS
 (HD/LE/M-Powered)
 Any software application

The MC Mix is designed to work with up to three additional MC Mix units and/or one MC Control to create a larger, integrated system with up to 36 faders. MC Mix and MC Control units can be elegantly clipped together or be situated anywhere on the network.

MC Mix Specifications

Dimensions: 16.8" (420mm) x 9.5" (238mm) x 1.2" (30mm)
 Weight: 4.8 lbs (2.2kg)
 Line voltage: 100 – 240V AC
 Frequency: 50Hz to 60Hz
